

Terms & Conditions

Last updated: 19 September 2026 · Steel3D LTD · Advance Steel & AutoCAD detailing (zero fabrication)

1. Who we are & what we provide

Steel3D LTD concentrates on **Advance Steel** and **AutoCAD** structural steel draughting and detailing — GA / assembly / part drawings, BOM lists, and NC/DSTV data as scoped. We may site-visit, measure and draw your project from conception to completion. **We do not fabricate, supply or erect steel.** This site and these terms relate only to Steel3D LTD — not to any other product brand.

steel3d.co.uk is a commercial client site for information, company profile registration, commercial quote submit, job portal previews, documents and contact. There is no public CAD workstation and no client-facing chatbot. The private Owner vault is for Steel3D LTD only; public registration for portal login is closed.

2. Company profile & quote submit

A **Company Profile** saves contact, company, email, phone, address and logo for titleblock / invoice branding. It does not open a client login. New profiles start as pending verification until Steel3D LTD approves them.

Submit CAD / PDF for commercial quote does not require a portal login. By submitting you confirm the details and files you provide are accurate and that you accept these Terms and the Revisions Policy below. You receive a sequential **Job Reference Token** (e.g. S3D-0001). Quote that token on all correspondence.

3. Previews, payment & unlock

Until the invoice is paid (and, where required, the company profile is verified), deliverables shown on the job portal are for review only — typically a watermarked GA overview and, when attached, a view-only interactive 3D Shared View (orbit / measure; no fabrication files from that window).

Payment is taken via Stripe Checkout (or as otherwise stated on the invoice). After payment, Steel3D LTD releases the scoped fabrication pack (e.g. NC1/DSTV, clean GAs, assemblies, parts, BOM). Unpaid previews must not be used for cutting or fabrication.

4. Fees, VAT & indicative bands

Fixed commercial quotes follow drawing submit. Public estimators are indicative only. Typical detailing bands (ex VAT unless stated): sub-tonne from £180; primary steel £65/t (<10 t), £55/t (10–30 t), £50/t (>30 t) with a 12% fittings allowance on mass; platework / brackets £180 plus £25 per unique mark (detail once, nest many — quantity does not multiply the detailing fee); optional CNC DXF +£45 under 1 t; express 24–48 hr +35%. Other job types may use stated minima in the private vault.

5. Revisions Policy (£50/hr)

Initial draughting packs include **one model sign-off revision cycle** before final issue, unless your quote states otherwise. Post-approval structural alterations, engineer RFI changes, or re-issue of NC/DSTV / GA packs after late design change are billed at the standard hourly draughting rate, **hard-capped at £50 per hour**. Variation notices pause CNC / GA release until you approve.

6. Acceptable use

Use steel3d.co.uk only for lawful business purposes. Do not disrupt the site, probe or reverse engineer internal systems, misuse another organisation's job data, or attempt to open unauthorised access to the Owner vault.

7. Intellectual property

Unless a project contract states otherwise, Steel3D LTD retains intellectual property in methods, templates, manuals, UI and software. Project drawings and models are issued for the agreed purpose under the contract licence. Documentation describes **what** we deliver — not internal algorithms. Licensed PDFs are marked intellectual property of Steel3D LTD.

8. Scope, site visits & responsibility

Site visits, surveys and drawing sets are performed to the agreed brief. You remain responsible for design criteria, approvals, fabrication and erection. Steel3D LTD does not certify structural adequacy unless expressly engaged as designer of record. All exports must be checked by competent persons before cutting or fabrication.

9. Privacy

Personal data is handled under our Privacy & Data Protection Policy (PDF in the Documents library on steel3d.co.uk).
